

MCP RAG

MCP (Model Context Protocol) is a standard for AI agents to communicate with tools and data sources. It is implemented using **LangChain** for RAG (Retrieval-Augmented Generation) and **PDF** processing.

MCP?

MCP (Model Context Protocol) is a standard for AI agents to communicate with tools and data sources. It is implemented using **LangChain** for RAG (Retrieval-Augmented Generation) and **PDF** processing.

MCP

```
from mcp.server.fastmcp import FastMCP

mcp = FastMCP(" ")

@mcp.tool()
def my_tool():
    pass

if __name__ == "__main__":
    mcp.run(transport="stdio")
```
